# Helping you get on with business

**Workspace Systems is your partner for any Racking or Shelving fitout. Since 1994 we have been working with businesses and organisations to help them maximise and organise their space, with cost effective and quality solutions.**

By sourcing products from a range of local and international suppliers and manufacturers, we can supply our customers with a multitude of quality products and storage solutions. We provide professional service and in-depth knowledge of the products that we sell.

# Racking & Shelving

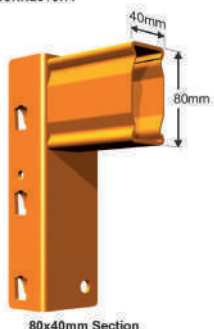

## PALLET RACKING

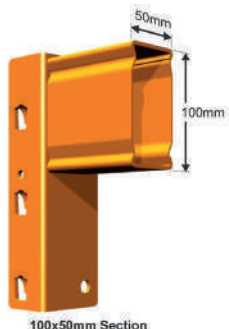

Apex pallet racking has been designed and engineered in Australia and complies with Australian Standard 4084-2012. Selective pallet racking is the most common type of pallet racking used in Australia today, but there are many variations of pallet racking such as drive-in, narrow aisle, double deep, archive, cable, vertical, tyre and carpet rack, all of which can be constructed with Our Rack components.

## Roll formed box beam

Our roll formed box beams are designed to withstand a higher level of impact and retain their shape better than some other types of beam sections on the market. Our beams are powder coated in orange and use a simple, punched key-lock design connector with spring-locking safety clips.

BEAM LENGTH	BOX SECTION	CONNECTOR
1372mm	80 × 40mm	3 pin
1524mm	80 × 40mm	3 pin
1829mm	80 × 40mm	3 pin
2134mm	80 × 40mm	3 pin
2438mm	80 × 40mm	3 pin
2591mm	80 × 40mm	3 pin
	90 × 50mm	3 pin
	100 × 50mm	3 pin
	120 × 50mm	4 pin
	140 × 50mm	4 pin

## HDG beam

Our hot-dipped galvanised beams are made from a rectangular hollow section and are typically used for outdoor applications. The hot dipped galvanised surface treatment makes them more resistant to rust.

BEAM LENGTH	BOX SECTION	CONNECTOR
1372mm	75 × 50mm	3 pin
2591mm	75 × 50mm	3 pin
	100 × 50mm	3 pin
	125 × 50mm	4 pin
2743mm	75 × 50mm	3 pin
	100 × 50mm	3 pin
	125 × 50mm	4 pin

## Frames

Several frame grades are available depending on the load required; these are identifiable with a unique stamping code, which indicates the steel thickness and profile.

FRAME HEIGHT	APEX SECTION	FRAME DEPTH
914mm	90-15	610 / 838 / 1219mm
1829mm	90-15	610 / 838 / 1219mm
2438mm	90-15	610 / 838 / 1219mm
3048mm	90-15	610 / 838 / 1219mm
3658mm	90-15	610 / 838 / 1219mm
4267mm	90-15 / 90/20	610 / 838 / 1219mm
4877mm	90-15 / 90/20	610 / 838 / 1219mm
6096mm	90-15 / 90/20 / 90-25	610 / 838 / 1219mm

## CANTILEVER RACKING

Cantilever racking is primarily used for storing long, awkward and oversized goods. This type of racking system provides maximum storage capability with easy accessibility. It is available in both single-sided and double-sided configurations. There are two surface coating options: powder coated for indoor applications and hot dipped galvanised for outdoor applications. Work space system cantilever systems are designed in accordance with FEM 10.2.09 The design of cantilever racking.

### Typical storage applications include:

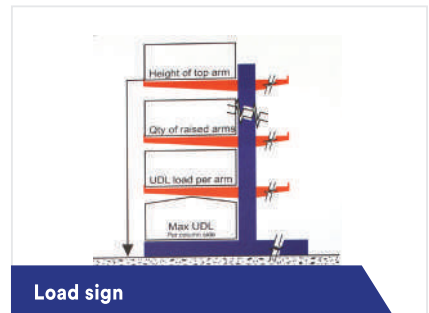

- Plywood/chipboard
- Timber
- Sheet metal
- Tubing
- Aluminium extrusion
- Furniture
- Structural members
- ...and much more

Removable end stop pins

Arm connector

Load sign

## C200 Cantilever Racking

Also known as light duty cantilever racking, this racking is designed for lighter storage requirements. The arm ratings typically vary from 250kg/arm to 450kg/arm, depending on the arm length and configuration of the cantilever system.

	POWDER COATED	GALVANISED
Post Height	2000mm 2400mm 3000mm 3600mm 4200mm	2000mm 2400mm 3000mm 3600mm
Arm Length	700mm 900mm 1200mm	700mm 900mm
Bracing / Spacing	900mm 1200mm 1500mm 1800mm	900mm 1200mm 1500mm 1800mm

## Heavy Duty Cantilever Racking

This cantilever system utilises posts section sizes of either a C305, C350 and C410mm sections, and are a common storage solution for storing a variety of building & construction materials. Typically, the arms are rated to a capacity of 1000kg UDL, but this may vary depending on arm length and racking configuration. By offering a C305, C350 and C410 section sizes, we can cater for lower or higher loads in a single column, and so a safe cantilever system can be designed according to your needs and budget.

	POWDER COATED	GALVANISED
Post Height	3048mm 3658mm 4267mm 4877mm 6096mm	3048mm 3658mm 4267mm 4877mm 6096mm

Bracing / Spacing	900mm 1200mm 1500mm 1800mm 2100mm	900mm 1200mm 1500mm 1800mm

## LONGSPAN SHELVING

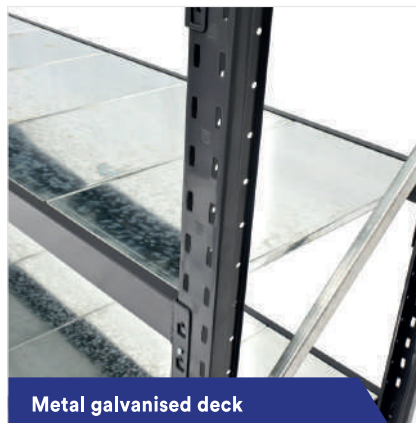

Longspan shelving provides an inexpensive storage solution ideal for a range of applications such as box or archive storage, storerooms, parts storage, workshops and workbenches. Available in a variety of shelf types, chipboard and mesh deck is commonly used for general purpose applications and the steel galvanised deck is generally used for grocery applications, so spillages can be easily wiped clean.

<b>BEAM LENGTH</b>	900mm	1200mm	1500mm	1800mm	2100mm	2400mm

## GONDOLA SHELVING

Gondola shelving is widely used in retail settings such as grocery stores, supermarkets, chemists, hardware and discount stores. We have a multitude of hardware accessories to enhance your shelving, and it is available in single and double-sided configurations.

<b>BAY HEIGHT</b>	1500mm	1800mm	2100mm	2400mm (using 300mm extension)

## Galvanised rivet shelving

Galvanised rivet shelving is used for a variety of applications including box or archive storage, storerooms, parts storage and workshops. Its electro galvanised surface treatment makes it ideal for cool room shelving. Available in a variety of shelf types, the chipboard is commonly used for general purpose applications and the steel galvanised deck and mesh deck is generally used for grocery applications or cool rooms.

<b>BAY LENGTHS</b>	910mm	1210mm	1510mm	1810mm	2110mm	2410mm

## Rolled upright type R.U.T

Rolled upright type (RUT) shelving is a simple, steel shelving system with modular bays which can have adjustable shelves. Each shelf will hold up to 80kg UDL (depending on the shelf size) and you can have as many adjustable shelves as you require, to a maximum bay loading of 800kg.

<b>BAY HEIGHT</b>	2175mm

# Mezzanine Floors & Barriers

## MEZZANINE FLOORS

Mezzanine floors, otherwise known as raised storage areas, are a cost-effective method of doubling your existing floor space. These can be constructed from our modular structural system or work space Rack pallet racking. All our mezzanine floors are designed to Australian standards and are fully customisable.

### What we need to know to be able to design your Work space mezzanine floor:

- Length, depth and height
- Free-standing or attached to an existing structure
- Position of access gates, hand rails and stairs
- Floor loading requirements
- Other special requirements

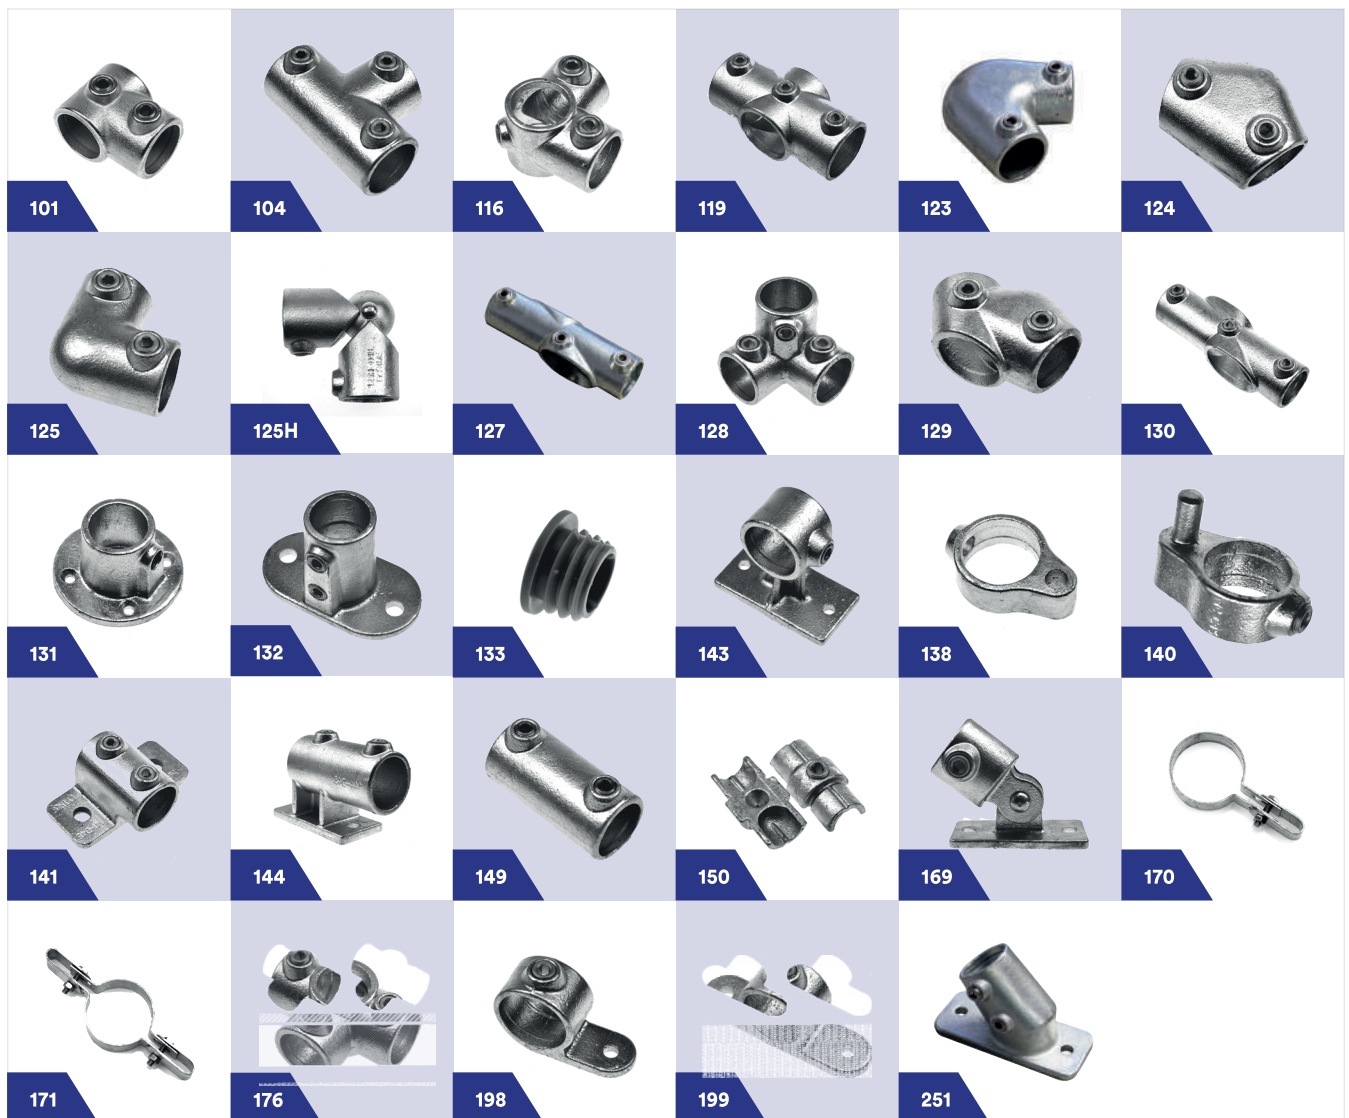

# Mezzanine Floor Gallery

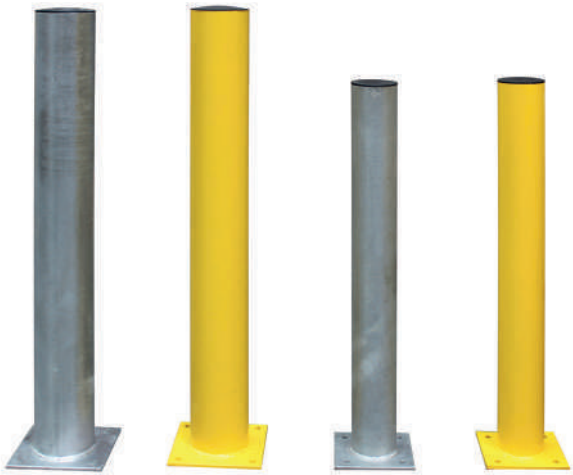

## CLAMP STYLE HAND RAIL

Clamp style hand rail is durable, and uses a galvanised clamp system that allows for the construction of any hand rail or barrier system. This versatile system can be used for a variety of other applications such as trolley bays, animal enclosures and playgrounds without the need for welding or fabricating custom structures.

# Tool boxes

## TOOL BOXES

We have a large range of ute tool boxes to suit any application. No matter what ute model or type you have, we will have a box for you. Our boxes are made with quality and durability in mind, incorporating durable drawer slides, stainless steel t-handles and rubber seals that are resistant to dust and weather. These boxes are the tradesperson's preferred choice.

Our range includes tool boxes for both under and above the tray, allowing the serious tradie to use space effectively. Our range also includes jobsite boxes, drawbar boxes and small generator boxes.

## Under tray tool boxes

<b>MODEL</b>	TB0030 / TB0040	TB0042 / TB0043	TBA0130 / TBA0135
